MBRD

Interface Board and Windows®-based Programming Software

*for ABSOLUTE PLUS IMN200RS series
and MESDAVE200RS barrier*

 MADE IN ITALY

MBRD

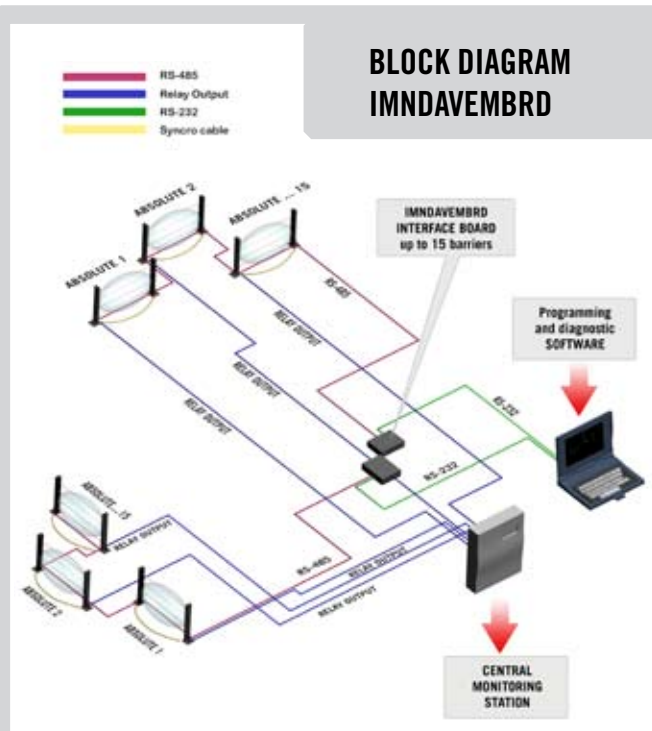

Interface Board and Windows®-based Programming Software

MAIN FEATURES

- Higher accuracy in the programming
- Better Target discrimination
- Easier and Faster diagnostic
- Event Log with Graphic representation of Alarms
- Connection of up to 15 Barriers within one serial line (range limit 1.000mt.)
- Input and Output functions selectable

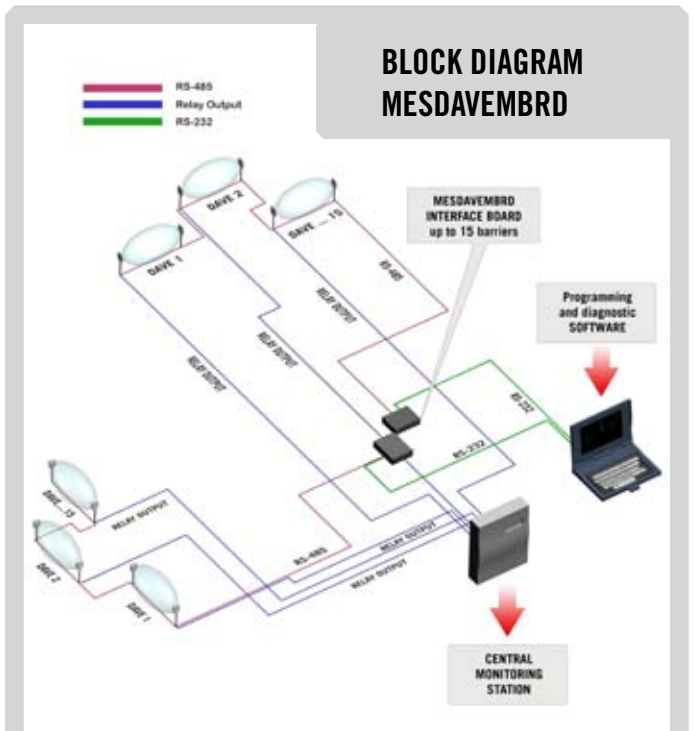

MBRD system is a state-of-the-art communication tool that allows security Installers and System Integrators to program **ABSOLUTE PLUS** and **DAVE** barriers through PC and Laptops (via RS485) with much more accuracy if compared with traditional barriers provided with manual settings.

Additional **MBRD** feature is the faster system diagnostic that allows Security Operators to check barriers status at any time directly from the Control Room avoiding site inspections and barrier opening.

EQUIPMENT SUPPLIED FOR ABSOLUTE PLUS
