

Access Management Software (AMS) :-

Download engine/Smart engine is smart-I's Access Management Software. Apart from small offices it is also suited for large-sized, complex areas equipped with a TCP/IP Local Area Network Organizations with their H.O., Branch offices & manufacturing units situated geographically at different locations can be controlled from Central Location with Smart I Access Control Systems installed. These devices need to be configured online and download data from different locations to a Single/Centralized location. RMS can Manage/Configure any devices from any location with ease & with minimum human intervention.

The AMS has various other value added features like Auto Downloading, Online Status of Devices, LCD Messaging, Creating and Setting User Rights, Setting Access Levels, Fingerprint Template Management etc.

Thus AMS's various features enable you to manage your Attendance/Access Controller Systems more easily and efficiently than ever before.

Attendance Software:-

smartSOFT is available in three different versions i.e. Classic / Professional / Advance.

All three versions are designed and developed keeping in view that it can cater to the needs from Small offices & Single locations to Multi-Company, Multi-location & Multi-Divisions. Meets all Attendance Parameters, Leave Rules/Management & Generates Various Reports.

1. **smartSOFT Classic™** is suitable for small enterprise that does not have complex Time Office, Attendance and Leave Rules.
2. **smartSOFT Professional™** is Comprehensive Time Attendance And Leave Management Software, especially designed to fulfill organization's policies. It can present the same in formats/reports easy to understand.
3. **smartSOFT Advance™** is a Complete and Comprehensive Time Attendance And Leave Management Software, especially designed to cater the need of an organization with Multi-Company, Multi-location & Multi-Divisions. The Advance version is with user interface that is easy to operate and rich in functionality and also provides comprehensive attendance report. The Advance version also has optional modules like Auto Email Alerts / SMS gateway as well.
